Your CHOICEPAY Option ARM Statement Information at Your Fingertips.

1. *Account Information*

Your mortgage is a vital part of your total financial picture. For this reason, we provide up-to-date information about it on your statement each month. At a glance you can see your loan number, interest rate, and payment, as well as your loan's monthly payment and maturity dates.

2. *Activity Since Your Last Statement*

This section tracks all account activity since your last monthly statement. It helps you keep track of your loan by showing you how your last payment and total payments for the year were applied. This section also helps you manage your tax liability by detailing any deferred interest and the total interest paid.

3. *Payment Options*

Four payment options each month give you more control over your monthly cashflow. Pay the best option for you each month. You can also apply additional payments toward your mortgage principal, resulting in an immediate reduction in the required monthly payment for interest-only and standard amortizing options and a possible reduction in your minimum payment at its next adjustment.

** The hypothetical rates and payments used in this example are for illustration only.*
